### **\*Japan's first Windows Vista support USB wireless LAN adaptor for Internet browsing and online game for portable game devices Beta Version Driver and Utility for GW-US54Mini2 series are announced**

Planex Communications Inc.(President/CEO : Katsuaki Kubota, Headquarter : Tokyo Shibuya-ku, JASDAQ code 6784 ) announced that the beta version of new driver and utility for USB Wireless LAN Adaptor GW-USMini2 series which enables to browse the Internet and play online game by portable game devices such as Sony PSP by connecting to PC has been released to public from Planex's website. This will provide the following benefit.

#### ■ **Software AP function for Windows Vista**

In addition to Windows 2000/XP, it supports Windows Vista as well. Therefore, this new driver and utility are enabled to use more services for portable game devices using USB wireless adaptor.

#### ■ **Support WPS**

It supports WPS which provides easy set up of wireless LAN security. Also its function is upgraded as a wireless LAN client.

※In order to use WPS function for wireless LAN set up, the main unit has to have WPS function as well.

#### ● **What is WPS?**

WPS is a abbreviation of "Wireless Protected Set up" and is regulated for easy setup of security and connection for wireless LAN device without complexity. "The Wi-Fi Alliance" who is an industry organization of wireless LAN related made the specification and certify the supported devices since January 2007.

We, Planex will support customers satisfaction by providing new driver utilities continuously after purchasing the products. Thank you for your patronage.

※ "Playstation" and "PSP" are registered mark by Sony Computer Entertainment, Inc.

※ Please download new driver V1.2.3.0(2000/XP) / V3.1.1.0(Vista) for GW-US54Mini2(G/W) from Planex website.

\* As of November 27<sup>th</sup>2007 researched by Planex Communications.
