Thin and flat HDMI cables are announced for sale ~ enables for wiring under carpet or in narrow space

Planex Communications Inc.(President/CEO : Katsuaki Kubota, Headquarter : Tokyo Shibuya-ku, JASDAQ code 6784) announced today that flat type HDMI cables with about 2mm for both black and white color 1m/2m/3m 3 type which can be wired even under the carpet or narrow space will be sold in the end of February at resellers all over Japan and PLANEX DIRECT.

□□Main Features□□

■ Slimmed-down wiring/Thin and flat type

It is approx. 2 mm flat cable which even can be wired under the carpet or narrow space.

■ Enables to transfer both video signal and sound signal with one cable

Both digital video signal and digital sound signal from high vision TV or DVD recorder which supports HDMI (High-Definition Multimedia Interface) regulation can be sent with one cable. It is supposed to use for connecting between DVD with HDMI output terminal and TV with HDMI input terminal.

■ Fully compatible with high vision

It is compatible with the full high vision with 1080p, the movies with Blue Ray or HD DVD format or high quality of game images can be projected clearly in detail.

■ Support HDMI (High Speed) (Confirmed "Playstation3" compatibility)

It is compatible with HDMI(High Speed). AV devices such as "Playstation3" is compatible, so it provides high quality movie and sound.

※"Playstation" is a registered mark of Sony Computer Entertainment Inc.

■ Adopt 24K gold coated plug

The plug is used 24K gold coat which has low contact resistance and protect from signal degradation caused by corrosion like rust. This will protect degradation of resolution by holding age deterioration as well.

■ Adopt high purity OFC(oxygen free copper)

A high purity 99.99% OFC(oxygen free copper) is used for this cable which enables to hold generating a signal gap or transportation loss.

■ Various Lineup

There are black and white color of cables with 1m/2m/3m for each, so the best fit cable can be selected for various usage.

■ Support RoHS

Through the production to the scrap a product life cycle, this product supports 「RoHS」 which is to limit the usage of harmful substance such as lead, cadmium, liquid silver, hexavalent chrome, polybrominated biphenyl, Polybrominated diphenyl ether.
