Wiring HDMI cable of possible, thin flat type puts it on the Market to the carpet under and a narrow space various.

Planex Communications Ltd (The President and Representative Director Katsuaki Kubota Headquarters: Shibuya Ward, Tokyo, JASDAQcode 6784) We will put three kinds of each of the black of the HDMI cable of the thinness flat type of about 2milli that can be wired and 1m/2m/3m of white cables on the market through the main agency and PLANEX Direct of the whole country in the end of February.

□□The main feature□□

■ **Wiring also refreshingly: Thin flat type**

It is about 2milli flat type cable of thinness that can be wired the carpet under and a narrow space, too.

■ **The image signal and the audio signal can be transmitted with one cable.**

Each signal of a digital image and the digital voice between equipment such as the high-definition televisions and DVD recorders that suit the HDMI (High-Definition Multimedia Interface) standard can be transmitted only by one cable. When the HDMI output terminal such as DVD and the HDMI input terminal such as the televisions are connected, it uses it.

■ **For full high-definition television**

It can enjoy the game screen etc. of the image contents and the high-resolution of a blue lei and the HD DVD format from which the sale will be expected more and more in the future in the ultra-high-density because it corresponds to a full high-definition television of 1080p by a clear image quality.

■ **It corresponds to HDMI(High Speed) for HDMI(High Speed) ("PLAYSTATION3" the confirmed operation). In the connection with the audio-video equipment including "PLAYSTATION3", it can enjoy the image and the voice of the high quality.**

■ **"PLAYSTATION" is a registered trademark of Sony Computer Entertainment Inc.**

■ **24K gold-plated plug adoption**

The contact resistance is a little, and 24K gold-plated plug that prevents deterioration in the signal due to the corrosion such as Sabi is adopted. As a result, a change with the lapse of time is suppressed, and deterioration in the image quality is prevented.

■ **High purity OFC (no oxygen copper) is used.**

OFC (no oxygen copper) cable of the high purity 99.99% that suppresses generation and the transmission loss of the warp of the signal is used.

■ **Lineup that can be additionally chosen to be usage**

The color of the cable are two kinds, and arranges three kinds of 1m/2m/3m of the black and white respectively as a lineup. The best cable can be chosen by the usage.

■ **For RoHS**

It corresponds to "RoHS" to which the amount of use of the poisonous substance of lead, cadmium, mercury, six value chrome, the Pori smell making biphenyl, and the Pori smell making diphenyl ether is restricted aiming to suppress person's health and the load to the environment to the minimum at the life cycle of the product from production to disposal.

● **High-speed HDMI flat cable lineup**
