

Memory Stick <-> Compact Flash  
(Type I) Adapter  
**CF-MS**

### Feature

The CF-MS enables your computer to write and read data to and from Memory Stick through a compact flash slot.

- Simply attach the CF-MS to Memory Stick, and your PC with a compact flash slot (Type I) is ready to read and write data to Memory Stick through the CF slot.
- Furthermore, you can also attach the CF-MS - Memory Stick assembly to:
  - [CF-PCM](#)(common option unit for CF-10T/CF-100TX: Compact Flash Type 1 - PCMCIA Type II Adapter) to access Memory Stick via a PCMCIA (Type II) slot), or
  - CF-U11(Compact Flash Type I/II - USB adapter) to access Memory Stick via the USB port.
