

10M/100 CardBus LAN Adapter FW-310TX

Feature

■ Supports CardBus

This adapter supports the 32-bit CardBus standard. It resolves the bottleneck problem, which may occur when sending and receiving 32-bit data through a 16-bit bus between the PC and the high-speed network equipment.

■ 10/100BASE-TX Auto-negotiation

The FW-310TX supports both 10BASE-T and 100BASE-TX. As it can be used on 10Base-T networks, it allows gradual network environment upgrades. Moreover, the card's Auto-Negotiation mechanism automatically selects the best speed (10BASE-T/100BASE-TX) and duplex mode (Full/Half Duplex) as soon as the card is attached to another network device.

■ Supports Full Duplex Operation

The FW-300TX supports full duplex mode - it can send and receive data simultaneously. In full duplex mode the adapter achieves the theoretical maximum data transfer rate of 200 Mbps (100Mbps x 2) on a switching network environment built with our FX-08MA (8 ports 10/100 Base Auto-Negotiation) switching hub.

■ Supports WindowsMe

The adapter supports WindowsMe as well as Windows 98, Windows 98 Second Edition, Windows 2000 Professional. The adapter is guaranteed to work with all of the above-mentioned operating systems.

Specifications

Product Model Number	FW-310TX	
Supported Standards	IEEE802.3/10BASE-T IEEE802.3u/100BASE-TX	
Transfer Speed	10Mbps / 100Mbps CSMA/CD	
Communication Mode	Full Duplex / Half Duplex Auto-Negotiation	
Bus	32bit CardBus	
Controler Chip	ADMtek AN985	
LED	Act ,Link	
Power Spec.	Operating Voltage	3.3V
	Power Consumption	125mA
Operating Temperatures	0-65 degrees Celsius	
Operating Humidities	35-85 % (non-condensing)	
Dimensions	54(W) x 10(H) x 133(D)mm(Projection: 54(W) x 12(H) x 18(D)mm)	
Weight	30g	
EMI	FCC Class B ,VCCI Class B ,CE Mark	
Supported Hardware	IBM PC/AT Compatibles with a PCMCIA Card slot	
Supported OSes	Windows 98/Me,Windows 2000, Windows 98 Second Edition,Windows XP	
Packing List	FW-310TX,Driver Diskette, User's Manual
